		pages	, filed with the demand		
		pages	, filed with the letter of		
		the cla	uims:		
		pages	, as originally filed		
		pages	, as amended (together with any statement under Article 19		
		pages	, filed with the demand		
		pages	, filed with the letter of		
		the dra	awings:		
		pages	, as originally filed		
		pages	, filed with the demand		
		pages	, filed with the letter of		
	П	the come	ence listing part of the description:		
İ					
		pages pages	, as originally filed		
		pages	, filed with the demand, filed with the demand		
2.	the i	nternation se elemen the lan the lan	to the language, all the elements marked above were available or furnished to this Authority in the language in which and application was filed, unless otherwise indicated under this item. Its were available or furnished to this Authority in the following language which is: Inguage of a translation furnished for the purposes of international search (under Rule 23.1(b)). Inguage of publication of the international application (under Rule 48.3(b)). Inguage of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/3).		
3.	With preli	minary e	to any nucleotide and/or amino acid sequence disclosed in the international application, the international examination was carried out on the basis of the sequence listing:		
	H		ned in the international application in written form.		
	H		ogether with the international application in computer readable form.		
	H		ned subsequently to this Authority in written form.		
	H		ned subsequently to this Authority in computer readable form.		
		interna	tatement that the subsequently furnished written sequence listing does not go beyond the disclosure in the ational application as filed has been furnished.		
	Ш	The sta	ratement that the information recorded in computer readable form is identical to the written sequence listing has urnished.		
4.		The an	nendments have resulted in the cancellation of:		
			the description, pages		
			the claims, Nos.		
			the drawings, sheets/fig		
5.		This rep	port has been established as if (some of) the amendments had not been made, since they have been considered to go the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**		
*	in th	icement s is report 10.17).	sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to t as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16		
**		•	ent sheet containing such amendments must be referred to under item 1 and annexed to this report.

•	Claims		NO			

2. Citations and explanations

Document 1: JP, 10-173187, A (Texas Instruments Incorporated), June 26, 1998 (06.26.98) Document 2: WO, 00/65631, A2 (Applied Materials, Inc.), November 2, 2000 (11.02.00)

Claims 1-3 and 5-10

The inventions described in claims 1-3 and 5-10 do not appear to be novel based on documents 1 and 2 cited in the international search report. "Nitrogen atoms are contained in high proportion in the vicinity of the surface of the oxynitride film," described in claim 1, is disclosed in document 1, Fig. 5, and document 2, Figs. 11 and 13.

Claim 4

The invention described in claim 4 does not appear to involve an inventive step based on documents 1-2 cited in the international search report. Documents 1-2 do not describe the point that "the maximum nitrogen content is at least 20% and no greater than 30%." However, in view of paragraph [0013] in document 1 stating, "indeed, in section 20, it is preferable that more nitrogen be present than oxygen (probably very little or no oxygen)," it can be said that document 1 suggests the point that "the maximum nitrogen content is at least 20% and no greater than 30%." Therefore, adopting this constitution could be easily conceived of by a person skilled in the art.

Claim 11

The invention described in claim 11 does not appear to involve an inventive step based on documents 1-2 cited in the international search report. Documents 1-2 do not describe the point that "said plasma is plasma based on a flat antenna member (RLSA)." However, in view of document 1, paragraph [0012] describing "plasma is preferably a high-density plasma," it can be said that document 1 suggests the point that "said plasma is plasma based on a flat antenna member (RLSA)." Therefore, adopting this constitution could be easily conceived of by a person skilled in the art.
